

# Library Food & Drink Policy

Recognizing that a comfortable study environment requires a food and drink policy that is not overly restrictive, the library has approved the following food and drink policy. In general, please use good judgment and be respectful and considerate of other patrons when consuming food in the library. The library staff reserves the right to require that a patron consume food outside the library if that patron's food consumption is disturbing the study environment for other library patrons.

## **Food and Drink Policy:**

- Food and beverages are allowed so long as you limit your food intake to quiet, non-odoriferous, or non-messy foods; all beverages must be in containers with lids.
- Please consume food in a manner that maintains a clean, safe library, and that minimizes the risk of damage to library books, equipment, and other property. If a spill occurs, please notify the library circulation staff. Also, please dispose of all uneaten food and food wrappers/containers in the cans outside the library as we hope this will avoid attracting insects and/or rodents.

*Remember, let's all do our part to keep out unwelcome visitors...*
